

ABOUT PIXEL PERSPECTIVES+ 360

Quick to complete and easy to interpret, Pixel Perspectives+ 360 was created for today's fast-paced workplace. This empirically-derived, feedback tool was designed to target the most powerful leadership practices for driving employee engagement and retention. Participants receive feedback from their supervisor, staff, and stakeholders about their level of strength across 20 key leadership practices as well as identification of the most important practices for success in their role. They also receive results of our *Staff Thriving Index* to gain valuable information about their team's current morale, belongingness, and 13 other key indicators of employee performance and attrition risk. The report provides them with targeted, actionable insights explicitly designed to translate the feedback into behavior change.
